EXPERIENCE

100Devs   Jan 2022 - present

Software Engineer   *Atlanta, GA*

- Collaborate with a team of developers to build modern and responsive web applications using JavaScript, HTML5, and CSS3
- Built semantically structured full-stack web applications using React, Node, MongoDB, and Express.
- Apply agile methodologies like SCRUM for project management, ensuring timely delivery and high-quality output.
- Develop secure web applications that follow best practices for web accessibility, such as semantic HTML and ARIA attributes.

Rose Consulting   June 2020 - Present

Full-Stack Web Consultant   *Atlanta, GA*

- Create full-stack web applications and static websites for various clients across small and medium size businesses
- Meet with clients to establish needs and create a plan to develop technological solutions to solve day to day business needs.
- Consulting on SEO and social media strategy

NOTABLE PROJECTS

Full-Stack E-Commerce Site

Full Stack Developer

- Created a digital storefront for small-medium business to sell their products and maintain their inventory.
- Developed a robust and scalable back-end with Node, Express, and MongoDB to ensure rapid CRUD operations for products, orders, and users
- Implemented JWT-based user authentication for improved security and user experience
- Utilized a range of technologies, including JavaScript, React.js, Redux, and MongoDB to deliver high-performance and reliable solutions for the E-Commerce platform

Maggie's Kitchens and Baths

Front-End Developer

- Developed a fully responsive showroom website for a kitchen and bath retailer using HTML, CSS, JavaScript and a PHP contact form
- Implemented vendor page so the customer can easily access products available and product information.
- Created multiple responsive gallery pages using CSS grid, displaying work completed by retailer

The Patch Pups

Front-End Developer

- Developed a fully responsive website for a dog groomer/dog trainer using HTML, CSS, JavaScript which contributed to 30% increase in customer count from previous year.
- Utilized advanced front-end technologies such as Tailwind CSS and DaisyUI to create a clean and intuitive user interface
- Implemented multiple contact forms using Netlify Forms, giving the user multiple ways to enquire about the services provided

EDUCATION

Suffolk County Community College   *Riverhead, NY*

- **Major: Culinary Arts: Bakery/Pastry Arts**
